## Do you have the characteristics of an entrepreneur?

This Entrepreneurship Psychometric Index instrument is developed by Professor Dr. Nor Aishah Buang from Universiti Kebangsaan Malaysia. It is called PIKEN which is abbreviated from the Malay language version of its name. It measures the value of an individual's entrepreneurial potential in terms of internal readiness based on psychological traits such as entrepreneurial attitude, thinking and behavior BEFORE he or she become entrepreneur.

### Register at PIKEN

<b>Measure the Entrepreneurial Potential</b> PIKEN aims to quantify an individual's entrepreneurial potential before he or she choose to become an entrepreneur. The potential includes dimensions such as entrepreneurial attitude, thinking and behavior.	<b>Appropriate and Detailed Assessment</b> PIKEN is the results of research and testing for eight years. The results and recommendations produced are very accurate and specific to each individual.	<b>Recommendations for Personal Development</b> PIKEN also provides necessary interventions for personal improvement of an individual's attitude, behavior and thinking as preparation to become entrepreneur.
